Silistix Appoints The European Operation to Manage Business Development in Europe

San Jose, Calif. – April 30, 2008 – Silistix, a leading provider of innovative software for the design of on-chip communication solutions, announced today that it has appointed The EUropean Operation Ltd. to provide support for their initial market development in Europe. The EUropean Operation, headquartered in the United Kingdom, specializes in evangelizing the products and goals of U.S. semiconductor companies with European customers, markets and the financial community.

“The European Operation is an excellent resource for rapidly expanding companies like Silistix,” said Tim Smith, Vice President of Worldwide Field Operations. “They act as an arm of our management team in Europe by establishing an early beachhead for our organization, promoting our company and products and helping us to gain traction with leading customers cost effectively.”

“Silistix represents a great opportunity for us,” said Adam Fletcher, President and CEO of The European Operation. “They provide a clearly differentiated solution for the most challenging issues facing SoC design teams today. By delivering predictable power, performance and area early in the design process, Silistix tools help engineers meet the extreme market pressures of converged electronics products.

About The EUropean Operation

The EUropean Operation operates as an outsourced management team for leading US-based technologies on a pan-European basis. Staffed by an experienced team of business managers from the semiconductor industry, the company is focused on significantly reducing the barriers of entry to European markets and proving their

business model with leading OEM customers. Headquartered in the United Kingdom with offices in Munich, Germany, Milan, Italy and Silkeborg, Denmark, EUO personnel are able to communicate technically in the major European languages. The European Operation has been in business for seven years and supports a number of leading semiconductor technologies. For more information visit:

About Silistix

Silistix is the leading supplier of on-chip interconnect solutions delivering predictable power, performance and area while cutting overall chip design time and effort. Silistix EDA tools and advanced circuit IP enable design teams to overcome fundamental challenges including global timing closure, clock distribution, power management, and utilization of the latest process technologies while meeting the extreme market pressures of converged consumer electronics products. The company is venture funded and has offices in Manchester, England, San Jose, California, and Tokyo, Japan. For more information on Silistix and its products visit www.silistix.com.
